DETAILED ACTION

This Office Action is in response to an Amendment filed 10/11/2004.

Currently, claims 1-3, 5-17 and 19-25 are pending.

Allowable Subject Matter

1. Claims 1-3, 5-17 and 19-25 are allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art, either singly or in combination fails to anticipate or render obvious, the limitations of:
 - ...performing a doping process on the silicon layer to form a heavily doped drain region beside the lightly doped drain region, and on the gate structure, wherein a dosage of the doping process is about $3E15$ to about $5E15$ ions/cm², as required by claim 1;
 - introducing n-type dopants to the silicon substrate to form source/drain regions in the substrate beside the gate electrode and to the gate electrode, wherein a dosage of the n-type dopants is about $3E15$ ions/cm² to about $5E15$ ion/cm²;
 - forming a cap layer over the doped polysilicon gate, as required by claim 16; and
 - ...implanting arsenic ions to the strained silicon layer and a top surface of the silicon germanium layer to form a heavily doped drain region beside the lightly doped drain region and to the gate structure;
 - forming a cap layer over the substrate;
 - performing a rapid thermal annealing process;
 - removing the cap layer; and

forming a nickel silicide layer atop the gate structure and the heavily doped drain region, as required by claim 23.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
